As humanity sits at an existential crossroads, this book introduces the need to build a nature-positive future to secure the functioning and stability of Earth systems essential to the survival and wellbeing of present and future human generations as well as the rest of Earth's amazing diversity of life. This book is essential reading for those concerned with conserving nature and securing a safe future for humanity in the face of climate breakdown, biodiversity loss, and ecological collapse.

The future can be bright. The choice is ours.
